Summary

Full stack web developer with extensive experience in Information Technology and a lifetime dedication to learning, growing, and improving. Effective at troubleshooting and problem-solving. Looking for new challenges and opportunities to grow and hone skills.

Technical Skills

Frontend: HTML5, CSS, TailwindCSS, Bootstrap, Javascript, jQuery, AJAX

Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars, Firebase

Projects

VinTek | <https://github.com/BrookesCodeStuff/VinTek> |

<https://floating-chamber-49203.herokuapp.com/>

- VinTek is a full-stack e-commerce site designed to provide customers with access to vintage technology. Customers are able to create accounts, view their account profile and order history, select and purchase items from the store.
- Built front-end storefront with the goal of providing a retro, early internet feel in the responsive design. Designed and implemented URL routes to direct incoming requests to the appropriate endpoint.
- Stack: NodeJS, ExpressJS, Sequelize/MySQL Stripe API, Handlebars, TailwindCSS, vanilla Javascript; deployed on Heroku

Treker | <https://github.com/BrookesCodeStuff/treker> |

<https://brookescodestuff.github.io/treker/>

- Treker was created as a site for travelers looking to go abroad and plan their trip beyond just hotel, flight, and rental cars. Treker provides travelers with a one-to-one currency exchange rate as well as allowing users to search for and save guidebooks that are relative to their destination.
- Built the guidebook display using the OpenLibrary and OpenCage Geocoding APIs, and crafted the responsive layout which displays the destination guidebooks.
- Stack: HTML5, TailwindCSS, and vanilla Javascript; deployed on Github Pages

Experience

Orlando Health

Orlando, FL

Solutions Developer

October 2019 - Present

- Key project resource for providing developer, integration, and related services on projects
- Design, implement, and maintain logical task automation for incoming and outbound data
